

# AQUA ROOTS

SOIL CAN BE  
WEAK, DRY, OR  
FULL OF PESTS.  
FARMERS ADD  
CHEMICALS, BUT  
THOSE HARM  
PEOPLE AND  
NATURE.

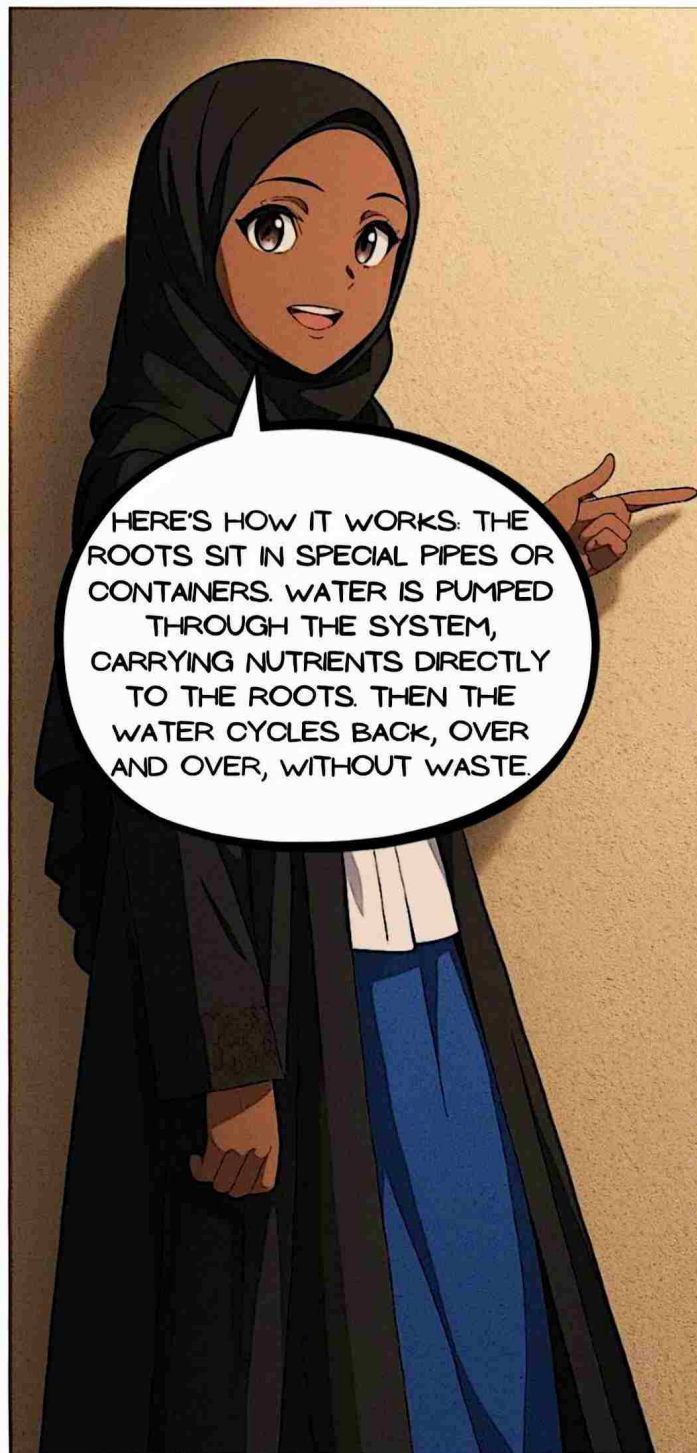

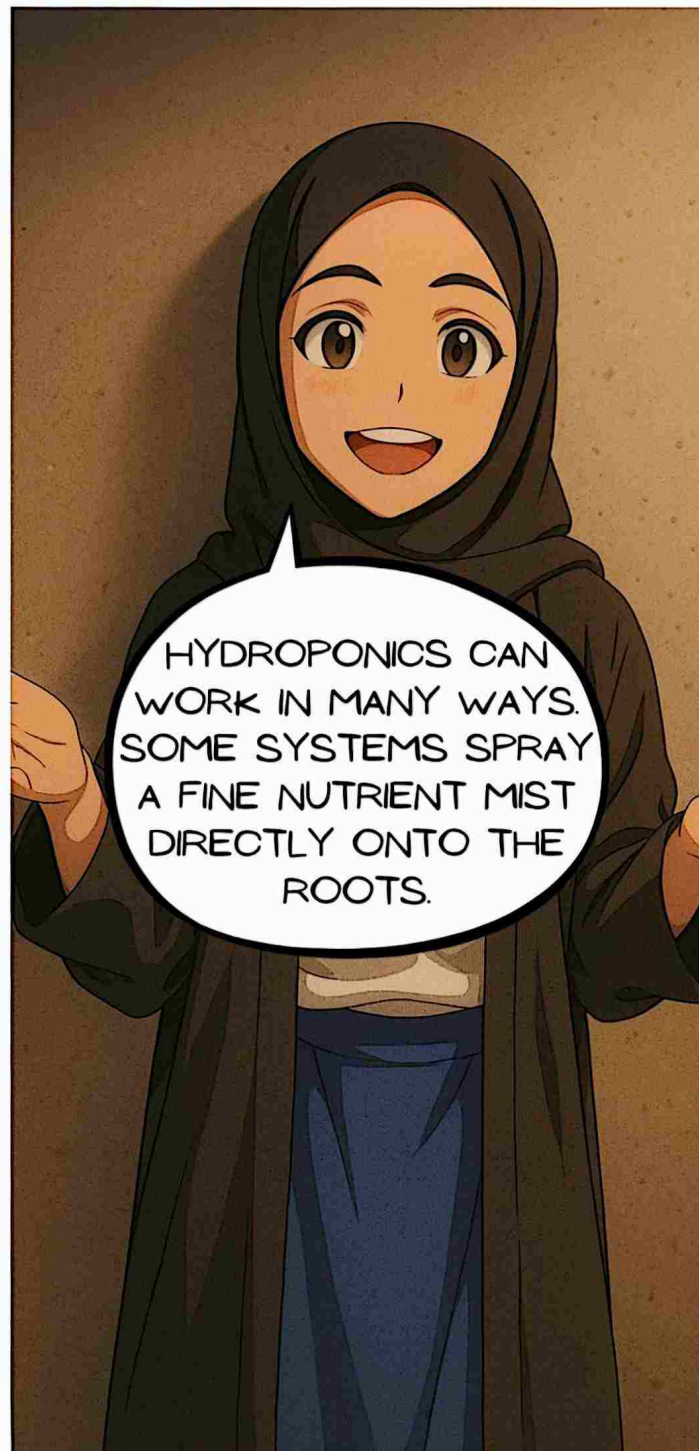

THAT'S WHY OUR  
PROJECT IS ABOUT  
HYDROPONICS. IT'S  
FARMING WITHOUT  
SOIL, AND IT ANSWERS  
ALL OF THESE  
PROBLEMS, WATER  
WASTE, BAD SOIL,  
PESTS, AND EVEN  
DEFORESTATION.

PLANTS DON'T  
DEPEND ON  
THE WEATHER.  
LED LIGHTS  
REPLACE  
SUNLIGHT  
WHEN NEEDED

SENSORS  
CHECK WATER,  
LIGHT, AND  
NUTRIENTS  
CONSTANTLY,  
SO THE  
BALANCE IS  
ALWAYS  
PERFECT

THAT MEANS  
FOOD CAN  
GROW ALL  
YEAR LONG,  
NO MATTER  
THE SEASON

AND TO PROVIDE  
ENOUGH FOOD FOR  
THE GROWING  
POPULATION  
HYDROPONICS GROWS  
FOOD FASTER THAN  
THE TRADITIONAL  
FARMING BY 30-50%

HYDROPONICS  
USES UP TO 90%  
LESS WATER THAN  
SOIL FARMING.  
THAT MEANS HUGE  
SAVINGS FOR  
WATER, ESPECIALLY  
IN DRY PLACES

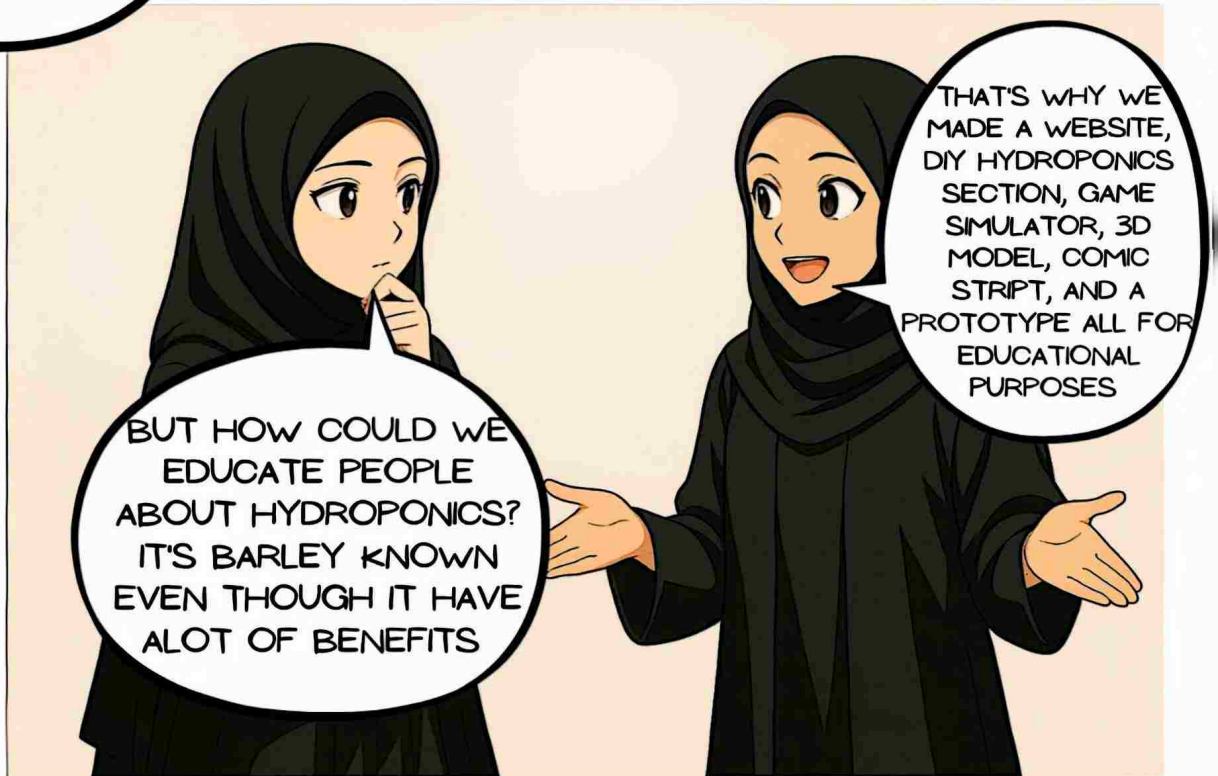

AND IT TAKES  
80% LESS SPACE,  
SO YOU CAN  
BUILD SYSTEMS  
ANYWHERE IN  
ROOFTOPS,  
BASEMENTS,  
CLASSROOMS  
EVEN IN SPACE  
STATIONS

BECAUSE OF  
DESERT CLIMATE  
AND POOR SOIL,  
SOME COUNTRIES  
RELY ON FOOD  
IMPORTS, BUT  
HYDROPONICS  
COULD REDUCE  
THAT NEED

BUT HOW COULD WE  
EDUCATE PEOPLE  
ABOUT HYDROPONICS?  
IT'S BARLEY KNOWN  
EVEN THOUGH IT HAVE  
ALOT OF BENEFITS

THAT'S WHY WE  
MADE A WEBSITE,  
DIY HYDROPONICS  
SECTION, GAME  
SIMULATOR, 3D  
MODEL, COMIC  
STRIPT, AND A  
PROTOTYPE ALL FOR  
EDUCATIONAL  
PURPOSES

IN THE WEBSITE  
WE'VE ADDED ALOT  
OF SECTIONS SO  
PEOPLE COULD  
BENEFIT FROM IT AS  
MUCH AS THEY CAN  
AS WELL AS WE  
ADDED AN  
INTERACTIVE GAME TO  
MAKE LEARNING  
ABOUT HYDROPONICS  
MORE FUN!

## What is Hydroponics?

Hydroponics is a method of growing plants in water enriched with nutrients. It meets the needs directly to the plants, and the technique promotes the efficient use of resources and large-scale farming.

WE'VE EXPLAINED HYDROPONICS SYSTEMS AND ITS PROS AND CONS IN THE WEBSITE. ALSO WE'VE ADDED Q&A AI ASSISTANT AND A DIY HYDROPONICS SO PEOPLE COULD TRY IT AT HOME IN AN EASY WAY

VISIT OUR WEBSITE AT  
[WWW.HYDROPONICSFM.COM!](http://WWW.HYDROPONICSFM.COM)

### FM EcoHarvest — Hydro Game

\$120 Balance Day 1

Water 60% Nutrients 60%

pH level 6.5 Light Day

Status  
Welcome: Click a slot in the center to plant.

Quests  
Harvest 3 lettuce to earn \$50

Achievements

Rookie Grower

Build something real. Grow with science

YOU'VE GOT A SHOP IN THE GAME WHERE YOU COULD BUY SEEDS THEN PLANT THEM AND TAKE CARE OF THEM, AFTER HARVESTING THEM YOU'LL GET MORE COINS TO BUY SEED AS WELL AS TRYING TO CONTROL THE WATER PUMP AND PH LEVELS IN THE WATER. YOU COULD ALSO UPGRADE YOUR TOOLS!

Controls  
Manage your system

Autosave /

Pump: 1 Reservoir: Stable PH adjuster ready

Tip: keep pH between 5.8-6.5 for most greens → slow growth

FOR THE CODING PART WE USED HTML, CSS, AND JAVASCRIPT FOR THE WEBSITE AND THE GAME, BUT FOR OUR PROTOTYPE WE USED ARDUINO TO ADJUST THE WATER PUMP.

```
void loop() {
```

```
// تشغيل الريلاي لمدة 10 ثوانٍ
```

```
digitalWrite(relay, HIGH);
```

```
delay(10000); // تأخير لمدة 10 ثوانٍ
```

```
// إيقاف الريلاي
```

```
digitalWrite(relay, LOW);
```

```
delay(300000); // تأخير لمدة 5 دقائق (300000 مللي ثانية)
```

```
315 function $id(q){return document.getElementById(q)}
316 function renderUI(){
317   $id('money').innerText = game.money;
318   $id('moneyMeter').style.width = Math.min(100, game.money/2) + '%';
319   $id('waterMeter').style.width = game.water + '%';
320   $id('nutrMeter').style.width = game.nutrients + '%';
321   $id('waterCnt').innerText = Math.round(game.water) + '%';
322   $id('nutCnt').innerText = Math.round(game.nutrients) + '%';
